Night Tour with watching crocodile Spotting

Check out canoes (motorized or not), together with a bilingual guide, to appreciate the sounds of the night in the jungle, with little chance to see crocodile (or other nocturnal animals.) Once paralyzed by crocodile this bright light of the lantern of the guides, the animal's eyes shine like small green lights, allowing locate. The guide will try to get carefully with their own hands and take on board to explain to the passengers of this reptile. Then, the little animal is returned to the river cautiously.

3rd. Date: June 15, 2010 Breakfast at the hotel and departure for the Meeting of the Waters tour with lunch at local restaurant. Return to hotel at 17.30 pm. Dinner (B-L-D)

Departure after breakfast Ecopark, regional boat. This day will have an opportunity to see two high points of the Amazon: The meeting of waters, the dark waters of the river are black with brown waters of the Rio Solimões and because temperatures and different speeds, do not mix (for a few kilometers) to form the Amazon River. This tour includes lunch in typical restaurant (buffet style). Also during this tour, visit to a riverside community (opportunity to buy crafts indigenous type) and an area of huge plants Vitoria - regia (depending on the season).

4th. Date: June 16, 2010 Breakfast at the hotel. Departure for tour of visits to Botos (river dolphins) in Acajatuba. Lunch. Visit to the jungle to see monkeys. Dinner. (B-L-D)

The Rehabilitation Centre of Wild Animals, known as "The Forest of Macaques", was created in 1991 to receive animals confiscated from illegal trade and aid has a triangular or quarantine center of the Municipal Secretariat of Environment and Sustainability - SEMMAS

On this place, animals are first placed in quarantine to be evaluated and treated by a team of veterinarians and biologists.

With a high rate of success of the program began, the animals reproduce easily to form new families.

In partnership with FFV Foundation (Living Forest), nonprofit and maintained exclusively by Amazon Ecopark Jungle Lodge, created a feeding practice. Twice daily (10.30 and 15.30) the animals receive food supplements which themselves derive from the forest, with necessary nutrients for a healthy diet. At the moment the site is open to visitors, exclusively for guests, always accompanied by skilled professionals, allowing tourists to film and photograph these animals in a totally natural and safe. On site you can also "adopt" (learn more <http://www.ffv.org.br>) of the animals and monitor their development.
